"I build systems that work for people." — 20 years | 52 countries | 15+ industries | \$500M+ in programs designed & delivered

FRACTIONAL EXECUTIVE LEADERSHIP

Fractional COO / VP of Operations

Embedded operational leadership for growth-stage, PE-backed, or scaling companies that need a senior operator without a full-time hire. I design operating rhythms, decision systems, KPI frameworks, and team structures. Diagnosis first — I find the human problem underneath the operational failure.

\$8,000 – \$15,000/month retainer

Fractional CTO / Chief Architect

Senior technical strategy and architecture leadership. Platform governance, vendor management, build-vs-buy decisions, and technical team structure. Ideal for companies with engineering teams that need strategic direction, not another coder.

\$8,000 – \$15,000/month retainer

CONSULTING ENGAGEMENTS

Operational Diagnostic Sprint

2-week embedded deep dive into your people, process, and technology. Stakeholder interviews, system audit, workflow mapping.

Deliverable: root cause map, prioritized roadmap, and execution plan with clear owners and timelines.

\$5,000 – \$8,000 per engagement

Program Rescue & Turnaround

Your program is failing, late, over budget, or losing stakeholder confidence. I diagnose the organizational dysfunction (it's rarely the technology), redesign governance and team structure, and restore delivery momentum. 100% rescue rate.

\$20,000+/month or equity + cash hybrid

AI-Native Operating System Build

Design and implement AI-powered workflows, knowledge systems, and automation for your business operations. Includes prompt system design, RAG pipeline architecture, AI governance framework, and change management for adoption. Not experimental — production-grade.

\$15,000 – \$50,000+

Executive Decision System Design

Most organizations fail because decision-making is inconsistent and undocumented. I make decision logic explicit: who owns what decisions, what inputs are required, escalation paths, and how outcomes are measured. Your org runs without you in the room.

\$8,000 – \$15,000

Enterprise Architecture & Modernization

Salesforce ecosystem strategy, legacy system migration planning, multi-cloud architecture, integration design (MuleSoft, APIs), and platform governance. 4x Salesforce certified. Led 24-system consolidation for 400K+ resident housing authority.

\$12,000 – \$30,000+ (scope dependent)

SPECIALIZED SERVICES

Government Contracting Advisory

RFP/RFI/RFQ response strategy, technical solution architecture for proposals, compliance mapping (FedRAMP, HIPAA, CJIS, SOC2), and proposal governance. 100% shortlist rate across two firms.

\$5,000 – \$15,000 per pursuit

AI Governance & Risk Framework

For regulated industries deploying AI into production. Risk assessment, compliance documentation, human-in-the-loop design, escalation protocols, and provider evaluation. Built for healthcare, government, and financial services.

\$8,000 – \$20,000

Professional Identity Intelligence

Executive career positioning service. I reverse-engineer target job descriptions against your actual experience, surface undocumented capabilities, and produce a canonical identity document that generates perfect-fit resumes, cover letters, and interview prep.

\$3,500 – \$5,000 per engagement

Vibe Code Audit

Your team (or an AI) wrote the code. I assess whether it's production-ready: architecture review, security posture, scalability concerns, technical debt inventory, and a prioritized remediation plan.

\$3,000 – \$8,000

SMALL BUSINESS & FOUNDER SERVICES

Technical Co-Founder Alternative

For non-technical founders who need a builder-operator — without giving up equity. MVP architecture, team structure, first hires, investor-ready technical narrative, and scaling from founder-led to team-led operations.

\$5,000 – \$15,000 per engagement

Small Business Digital Modernization

Get your business online and operational: website, booking/scheduling, e-commerce, workflow automation, and AI tools for local operations. Not a template — a system designed for how your business actually works.

\$2,000 – \$8,000
